

The Real “God Particle”

Science, The Big Bang, Light, Sound, Electromagnetism and The Voice of God

Summary

For several decades the scientific community has been raving about dark matter. They have allegedly built large complex machines (accelerators and colliders) to find “dark matter” in the hopes of finding the beginning of everything (our universe) and prove their so called “big bang **theory**.” These scientists (maybe not all of them, but most) are the same ones that claim that there is no God. Despite the fact that all of their work is based on **theories**, they claim science accounts for everything and everything has to have proof in order to be real. Through science they claim they can disprove God and prove the Bible false. They have taken our Christian beliefs, tried to discredit them with their “proof” and in turn called us crazy (*1 Corinthians 2:14 The person without the Spirit does not accept the things that come from the Spirit of God but considers them foolishness, and cannot understand them because they are discerned only through the Spirit; 1 Corinthians 1:18 For the message of the cross is foolishness to those who are perishing, but to us who are being saved it is the power of God.*)

Now, with the invent and spread of the Internet, scientific knowledge is widely available to all, even simple people who have no scientific understanding. People who are not scientists can, with simple research, look and find evidence of God in science. Wisdom, however, doesn't come from what they teach us in school, or what we read from an article or scientific publication, wisdom comes from our Creator the Word of God, (*Proverbs 2:6 For the LORD gives wisdom; From His mouth come knowledge and understanding*), and He sheds His light on us so that we may read, understand and share. (*James 1:5 If any of you lacks wisdom, you should ask God, who gives generously to all without finding fault, and it will be given to you.*)

What scientists don't realize is that, through their research and chase to find proof of science, they are proving the very existence and essence of God. Yet while the evidence is clear in front of them and easy to discern, they fail to understand and are blinded by pride, competition and a desire to work in the name of science instead of God. (*Romans 1: 21-23 For although they knew God, they neither glorified him as God nor gave thanks to him, but their thinking became futile and their foolish hearts were darkened. Although they claimed to be wise, they became fools and exchanged the glory of the immortal God for images made to look like a mortal human being and birds and animals and reptiles.*)

The Hadron Collider(s)

In its most simplistic form, the Hadron collider(s) and accelerators (of which there are reportedly 33,000) take an atom, strip it of the electrons (negative charges) leaving only

protons (positive charges) and through the use of magnets shoot them through beams (rings of various lengths/beam pipes) at incredible accelerated speeds and finally crash them with each other at specified locations. At these specified locations the detectors (particularly the ALICE detector) in essence take a picture of the crash: The detectors track, pick up and photograph the resulting debris from this crash and thereafter plug it into computers to be analyzed by scientists.¹

Light and Darkness

With CERN, colliders and accelerators, Scientists are trying to find the “dark matter” that supposedly results from these collisions. The idea is that if they do then they can go back to the big bang and understand the theory of the beginning of the universe.² To date, however, scientists have found no such thing and in fact several scientists claim there is no “dark matter.”³ What has definitely been produced are large amounts of heat and light.⁴

Naturally, the question follows, if all what they see is light then what is light? I don’t mean light like the light of electricity when you flip a switch in your house, but rather, light, like the light that lights up the universe, that “makes a star” (as they have claim they have done at the accelerator in Livermore, California⁵), light that showers the earth from the sun, from the stars...what is light? Light, much like sound, is a wave...*a vibration*. Science says that light is electromagnetic radiation⁶. Light visible to the human eye moves at certain wavelengths (vibrations), different colors have different wavelengths.⁷

The next question that arises is what is electromagnetic radiation? Radiation in its simplest form is energy in the form of waves⁸ (*vibrations*). Electromagnetic fields are fields produced by charged particles. Thus taking both definitions above, light is magnetic radiation that moves through space. Light also produces heat.

The white “wavelength” contains all wavelengths. Thus, white is every color, every vibration. On the opposite spectrum, black, is the absence of wavelengths. It contains no vibrations. It is also important to note that light and sound are extremely similar. The main difference between light and sound is that sound requires something to piggyback on, to travel on, and light in turn can travel through emptiness and can travel much faster and further.⁹ Everything in nature, and in life, is therefore a vibration. (*Romans 1:20 For since the creation of the world God’s invisible qualities, His eternal power and divine nature, have been clearly seen, being understood from His workmanship, so that men are without excuse*)

The Bible and the Big Bang

You may be wondering...what does all this science talk have to do with the Bible? It’s very simple. Now you understand what light is, what white is, and what black is, and now you understand that light is radiation and radiation in turn a wavelength...a vibration.

Now you also understand that what scientists are trying to find is the “big bang” which they claim is what started the universe.

You may be familiar with the following Bible verses: “*In the beginning God created the heavens and the earth. Now the earth was formless and empty, darkness was over the surface of the deep...*” (Genesis 1:1-2). If we look at this from a scientific perspective all that existed was dark matter, darkness, the lack of wavelengths, the lack of light or radiation.

And God said, “*Let there be light*” and there was light...and he separated the light from the darkness.” (Genesis 1:3) Boom!!!! The explosion of radiation, the explosion of light...the big bang...through which the “Word” of God- the “sound” of God created light. What people forget, and conveniently omit, is that God **said** – He spoke and in speaking He created vibrations. (*Psalm 33:6 By the word of the LORD the heavens were made, their starry host by the breath of His mouth.*)

These are the same vibrations that scientists can now see and make up the radiation that shines in the heavens, the light of the stars, the sun and the universe. The universe which was “dark matter” (Genesis 1:3) and then the explosion and bang of light which God created with his vibration. (*Genesis 1:3; Hebrews 11:3 By faith we understand that the universe was formed at God's command, so that what is seen was not made out of what was visible.*)

The entire theory of science on the creation of the universe exists in Genesis 1. This same action of speaking the creation into existence is still in action today in everything around us. Everything that exists still fulfills the creation command which God spoke. (*Psalm 19:1-6 The heavens declare the glory of God; and the firmament sheweth his handywork. Day unto day uttereth speech, and night unto night sheweth knowledge.*)

The Word, The Light, The Vibration

The Bible says that God commanded the universe in existence but what is a command? It is a word. What then is a word? When God spoke what words did he speak? A word to me or you is a component of letters and vowels combined together, a combination of sounds that produce a recognizable sound. Stop to think for a moment: At its core, a word is nothing more than a *vibration*. So when God spoke, He did not have to say the word light as we commonly know the word in English, instead God just spoke. He made a *vibration*. The same *vibration* that scientists have agreed exists (sound and light) and the same vibration of which they take pictures with all their hadron colliders and scientific equipment.

What do we take away from this? There was dark matter in the universe (no vibration) and the moment that God spoke, God made a vibration that turned into light, the light of the universe. This vibration is exactly the hot explosion of light that scientists now call the big bang. Scientists have never disputed this light (radiation) exists in our universe,

nor that there is some form of matter that moves things yet they cannot see it (dark matter), nor that vibrations (wavelengths) are in everything and are the very fabric and component of existence. Thus scientists through their own work are proving that *vibrations* of heat and light started the universe we know today: God said let there be light. Amen.

Existence

From this bang that was created, from this command, this word, this vibration God created the heavens and the Earth. (Genesis 1). From this big bang, that scientists claim happened, our entire universe was created, me, you, the plants, animals, everything. This light, this radiation is in everything.¹⁰ The Word (*vibration*) of God is in everything and through it all things were created. Yet again, science confirms the Bible.

And we can see the Alphabet (alpha – beat) beating when we see the daylight everyday, when the sun rises. God commanded the sun to rise. We see the alphabet “beating” when we hold a fruit in our hand. Its not just a simple fruit. It is the product of the expression of the living word of God! Matter is not just matter, it is the execution of God’s word turned into a physical form. Therefore, God Himself is present in all creation around us. The living word is presently beating in what we see, touch, and hear. If you are a true Christian, it is also living and beating in the Spirit of your heart.

We continue exploring creation through the Bible and Science:

And God said, “*Let the water under the sky be gathered to one place, and let dry ground appear.*” *And it was so. God called the dry ground “land,” and the gathered waters he called “seas.” And God saw that it was good. Then God said, “Let the land produce vegetation: seed bearing plants and trees on the land that bear fruit with seed in, according to their various kinds.” And it was so.*” (Genesis 1:9-12)

With His command, His vibration, His light, dry ground appeared and from that dust, from that ground, plants arose. God spoke the DNA code into each seed and those seeds brought forth fruit and vegetables. Thus in the seeds, in their DNA, is the vibration of God’s command – His very words which are commands like computer programs instructed to do something by command (programming) – to produce fruits and vegetables. And just like scientists think and claim in the theory of evolution (though I do not believe in evolution but rather in the power of the Word of God), vegetation came first from the dust. (Genesis 1:11-12) To this day creation continues to run and fulfill His command and program- an apple is an apple, a dog a dog.

And God said, “*Let the land produce living creatures according to their kinds: the livestock, the creatures that move along the ground, and the wild animals, each according to its kind.*” *And it was so.*” (Genesis 1:24) From the ground that had already been commanded to produce vegetation, life sprang forth. The Bible says that God commanded the **earth, the dust**, to produce all animals. Thus once again, the *vibration* of God, his Word commanded the dust to create animals. And since this dust already had the

command (program) to create trees and vegetation, it naturally follows that animals and plants share many genetic components that are similar. Not only were they created by the same Word (vibration-wavelength) but they were also created with a similar command. And yet again, science in its quest to disprove God instead proves Him with their “theories” that plants came first and animals second and that the DNA of both is very related.

After all the Words (vibrations/wavelengths) had been commanded, God then made His greatest creation: Man. *“Then the Lord God formed a man from the dust of the ground and breathed into his nostrils the breath of life, and the man became a living being”* (Genesis 2:7) Let’s examine this in detail: God took the dust, which already had the command of God to make plants and animals and from this same dust that had the command of God (the program of vegetation and animals). He formed man and breathed into Him. Science tells us that we share most of our DNA with animals. Naturally, the Bible confirms this and in its perfection the Bible is proved true through use of the questionable theories of scientists. There was dark matter, there was light (big bang), there was dust (comets and planets), there was vegetation (let the Earth produce vegetation), there were animals (let the Earth produce animals) and then finally the most “evolved” the most complex creation, the creation that had a little bit of everything in it: light, plants, animals....then came man. (God created man)

DNA

Out of all the things that science has shown us, no one questions DNA. In our world today, DNA is not a theory, in fact it is used in evidence to prove and disprove paternity and crimes and existence itself. The Department of Energy (and same supporter of CERN/The Collider ¹¹) started the Human Genome Project to map out all DNA. Thus no one questions the existence and proof of DNA.

Interestingly enough, however, while they tell you DNA is a code, scientists have never quite explained what DNA actually is. You are probably aware that it is a double helix that replicates and replicates and has a complex structure around it (a cell) that in turn moves, has ribosomes, mitochondria and every other cell part. But what really is the double helix? What is a chromosome? How do cells communicate (because there is no doubt they communicate)?

Cells are also vibrations. They, communicate through cell resonance, magnetic resonance, in accordance with magnetic fields (according to the work of Dr. Konstantine Meyl). DNA has orderly wavelengths (vibrations) and creates waves in a magnetic field and this is how cells communicate and operate! Scientists, in fact, have analyzed the sound waves produced by red blood cells. ¹² Even blood in its basic form if struck with a wave of light screams! ¹³

What does this mean with the Bible? It means that DNA, just like light, just like everything else in all creation is nothing more than a vibration. A vibration that travels in

a field of energy. Thus, the very core of our existence proves the Bible. We were made by a word, a vibration...a wavelength. Our DNA vibrates the very Word of God. Our DNA is the command of God which created man! Our DNA is our wavelength, our vibration, our own unique beautiful song. God, knows us each by this song that sings to Him daily. He knows us each by name. (*Psalm 147:4 He determines the number of the stars and calls them each by name; Isaiah 49:1 The LORD called Me from the womb; From the body of My mother He named Me*)

If scientists cannot understand that the vibration of God (His Word) created the entire world and that evidence of that is right before their eyes in every living thing, photographed by the very collider itself, picked up by their equipment and even in our DNA, then they are blind by choice. (*1 Corinthians 1:18-21 For the preaching of the cross is to them that perish foolishness; but unto us which are saved it is the power of God. For it is written, I will destroy the wisdom of the wise, and will bring to nothing the understanding of the prudent. Where is the wise? where is the scribe? where is the disputer of this world? hath not God made foolish the wisdom of this world? For after that in the wisdom of God the world by wisdom knew not God, it pleased God by the foolishness of preaching to save them that believe.*)

The Word

How does this all tie in with Christian Beliefs?

In the beginning was the **Word**, and the **Word** was with God, and the **Word** was God. He was with God in the beginning. **Through Him** all things were made; **without him nothing was made** that has been made. **In Him was life**, and **that life was the light** of all mankind. The **light** shines in the darkness, and the **darkness has not overcome it**. (John 1:1-5)

Clearly we can see that the Word (vibration) of God created everything. The light of creation is in all things. His light (vibration) is evidenced scientifically in ALL creation and in Him is all life. And in fact white light has every single color- it has all wavelengths. It is everything. This light is visible and invisible. It is photographed in the collider, it is heard when we speak, it is seen in a seed that becomes a large tree and in a DNA strand that vibrates to create a human life. The **Light** of God is everywhere.

Darkness on the other hand, has no vibration. It is void, it has no wavelengths. Thus all nothingness is darkness and that is why all of creation has the light of God. Interestingly enough scientists have not been able to capture darkness. As I mentioned before, they have not been able to find evidence of dark matter. The Bible tells us that darkness cannot overcome light. (*John 1:5 The light shines in the darkness, and the darkness has not overcome it.*) Since the Word, the light of God is in everything in our world, then it naturally follows that dark matter has no vibration (it is void of the word of God) and no wavelength, it has nothing and is not visible. The collider simply cannot see it, because it

is void and so long as the light of creation is around us, darkness will never be visible as it can never overcome it.

The Bible clearly tells us that the light of creation is in everything. The radiation that is in all of us, the vibration and wavelengths of the Word of God created all. (*Daniel 12:3 Those who are wise will shine like the brightness of the heavens, and those who lead many to righteousness, like the stars for ever and ever; Matthew 13:43 Then the righteous will shine like the sun in the kingdom of their Father. Whoever has ears, let them hear.*)

The Word and the Light

There was a man sent from God whose name was John. He came as a witness to testify concerning that light, so that through him all might believe. He himself was not the light; he came only as a witness to the light. The true light that gives light to everyone was coming into the world. (*Isaiah 9:2 The people walking in darkness have seen a great light; on those living in the land of deep darkness a light has dawned; John 3-19 And this is the verdict: The Light has come into the world, but men loved darkness more than light, because their deeds were evil.*)

He was in the world and though the world was made through him, the world did not recognize him. He came to that which was his own, but his own did not receive him. Yet to all who did receive him, to those who believed in his name, he gave the right to become children of God. (John 1:16-12)

Who is the Word? Clearly it is the voice, the vibration of God. But it is much more than that:

The Word became flesh and made his dwelling among us. We have seen his glory, the glory of the one and only Son, who came from the Father, full of grace and truth. (John 12)

The vibration of God that created all the universe, the wonderful vibration that runs in your DNA, in the seeds, in the dust and the light...became flesh. The Word became flesh. This flesh that came from the Word is the one and only true Son of God, our savior Jesus Christ, the **living** Word of God. The Vibration through which all things were created, were and are. He personified into flesh, came to Earth and yet...humanity which were the very words (vibrations) of God through which all was created, did not recognize Him.

Look around you, open your eyes and see that creation screams of the glory of God. It screams the vibration of God in each wave of existence. Science proves the very existence of our wonderful, marvelous God and of the Word that became flesh, our savior Jesus Christ.

John 3:16 For God so loved the world that he gave his one and only Son, that whoever believes in him shall not perish but have eternal life
